Intern Position: Project development/administration/outreach/education
Start date: Fall 2009 / Spring 2010
Time Commitment: Flexible
Schedule: Flexible
Pay Rate: No Pay/Volunteer

Skills Needed

- A. Good writing/research skills
- B. Strong computer skills
- C. Self-motivated, creative & enthusiastic
- D. General office skills
- E. Planning/organizing skills
- F. Responsible & flexible
- G. General environmental knowledge
- H. General motor vehicle knowledge
- I. Professional etiquette

Potential Projects (related skills):

1. Outreach to reinstate relationships with stakeholders and members; integral to the future success of the Clean Transportation Program (B, C, D, E, H, I)
2. Maintenance and updates to website & e-newsletter including blogging on solutions which reduce petrol use and enhance air quality. (A, B, C, G, H)
3. Outreach to fleet/operations/purchasing managers re: current clean diesel outreach campaign (B, C, D, E, H, I)
4. Research and document emissions characteristics of petroleum alternatives. (A, C, E, G, H + basic chemistry)
5. Creation of new marketing collateral to reflect the 3-strand approach to Clean Transportation based solutions. (A, B, C, E, G, H + graphic design)

What is Clean Transportation?

New problems require new solutions. Our region, our state, our country, and our planet face challenges unlike any before. An economy based upon the premise of cheap energy has created a society and transportation system which is unsustainable. An effective solution must address the long-term (source) and short-term (symptoms) solutions to this crisis. Therefore, the Clean Transportation program focuses on educating and advocating for an array of solutions that enable personal and institutional change, which directly address our over-reliance on petroleum based fuels.
